

Warning

The proper and safe handling of lithium batteries

If not handled properly, the battery may cause explosion, leakage or fire

- Do not expose to temperatures above 60° C (140° F) or charge where temperatures may become high.
- Do not expose batteries to direct sunlight
- Do not disassemble or modify batteries
- Do not drive a nail into the battery or crush it in any way
- Do not apply strong impacts to the battery
- Do not get batteries wet
- If something unusual is noticed, stop using the battery
- Keep batteries out of reach of children and animals
- Do not place batteries on top of an electromagnetic range
- Do not force decayed batteries into a device
- Do not use batteries that work for an extremely short period of time
- Do not short-circuit the battery
- Do not put a battery in a microwave oven, pressure container, or other such devices
- Do not recharge batteries where heat can build up
- Remove batteries from a device that is not being used for an extended period of time
